

## MISSION

To accelerate the affordable and equitable implementation of green stormwater infrastructure (GSI) throughout North America by supporting peer learning, innovation and collaboration among cities, counties and utilities.

## VISION

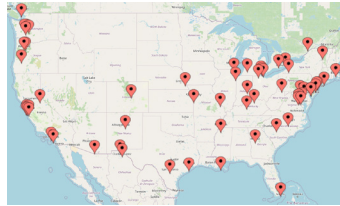

Communities with thriving GSI systems that further social equity, public health, and climate resilience.

## VALUES

Connection, Inspiration, Collaboration, Leadership, Community, Equity, Innovation

## AT A GLANCE

Member  
Organizations: 63  
Individual Members: 264  
Peer Learning  
Workgroups: 7

## BACKGROUND

The Green Infrastructure Leadership Exchange ("the GI Exchange") is a highly connected peer learning network that offers a platform for practitioners to share experiences, circulate ideas, and solve problems together toward finding more sustainable water infrastructure solutions. The GI Exchange is a project of the Global Philanthropy Partnership.

Member organizations include utilities, municipalities, cities and counties implementing infrastructure at scale, and individual members are typically managers of GSI programs committed to sharing their knowledge with peers. View current member agencies [here](#).

## OUR WORK & PROGRAMS

### Workgroups

We work primarily through learning workgroups focused on priority issues identified by members each year at our Annual Meeting. These workgroups are forums where peers share information, experiment, and work together to create better GSI solutions faster.

### Collaborative Grant Program

Our Collaborative Grant Program provides Exchange members with the opportunity to work with one another on projects that improve the speed, cost, or effectiveness of local GSI programs. Each year, the GI Exchange funds 2-3 projects, the products of which become components of our emerging GSI "playbook".

### Annual Meeting

Each year, we host a co-created network-wide gathering where members exchange resources and knowledge, make new connections, build relationships, and take part in network decision-making. Members contribute input and feedback about all elements of the program's design and planning, as well as generate the majority of the content.

## MEMBERSHIP

To learn more about membership, including eligibility requirements and the application process, visit the [membership page](#) on our website or email [amelia@giexchange.org](mailto:amelia@giexchange.org).
